

MO DEVELOPMENT GROUP OFFERS

WE OFFER:

Fee for service development program

MO Development Group serves as a fee developer or a fee for service for installation of equipment and/or project consulting services.

Turnkey build out

MO Development Group serves as project and construction manager, overseeing every aspect of the installation or project, ranging from equipment selection to delivery of the finished imaging center.

Our proven development process ensures a smart start and a strong finish, with clear communication every step of the way. Medical Professionals and imaging center management already have a full time job seeing patients or managing patient load and office professionals. We understand the importance of getting your center or equipment into operations and servicing patients as soon as possible. Construction Management is what we do, we establish strong project leadership at the outset of the development process, working closely with your team to understand your goals and timeline and establish key criteria for long-term success.

Why choose MO Development Professional Project/ Construction Management?

Our Professional Construction Management benefits everyone involved in the process:

- The client who anxiously awaits for the site to be completed (time is money).
- We provide a defined scope to trade contractors and they are held accountable to deadlines.
- Development/Project manager has ability to own process and drive results.
