

M.R.I CRYO SERVICES OVERVIEW

You don't want to manage the risk of losing your magnet due to a quench?

Let us take the burden!

Our Magnet Filling Service enables you to maximize MRI scanning uptime, while focusing on what you do best – providing service to your patients. We are a trusted and proven provider of complete cryogenic MRI service for all high field MRI magnets.

This includes the supply and transfer of liquid helium from non-magnetic storage dewars into the customer's magnet on an as-needed basis.

We also maintain the customer's magnet cooling equipment to manufacturer's specifications anywhere in the South East USA.

service@medicaloutfitter.net

We offer:

- We conduct fills after hours; no need for downtime!
- Monitoring of all parameters that can adversely affect the operation of your MRI.
