

SERVICE DEPARTMENT OVERVIEW

At Medical Outfitters excellence is what we aim for!

When it comes to selecting the best service plan for your imaging equipment, you can be assured that we will provide support starting with the product sale through project management, installation, monitoring and ongoing service.

When you call our service line, a team member answers (not voice mail) and will connect you with the expert who can meet your needs. An engineer is available 24/7.

Our priority is to provide prompt response and meticulous problem-solving.

There's no one-size-fits-all service plan when you work with Medical Outfitters, we will design one to meet your center's needs.

**Get maintenance in
accordance with
Original Equipment
Manufacturer (OEM)
specifications!**
